

Introduction

Results

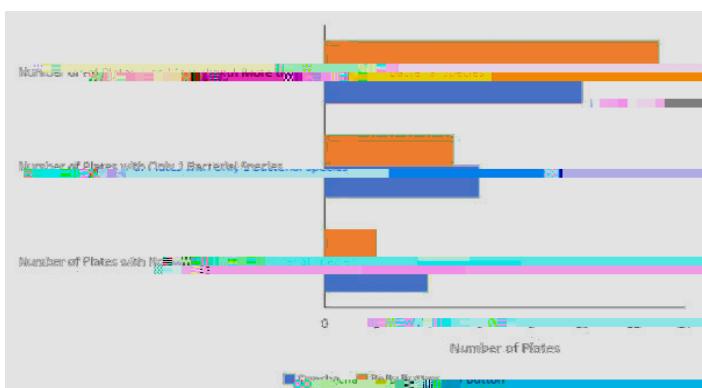

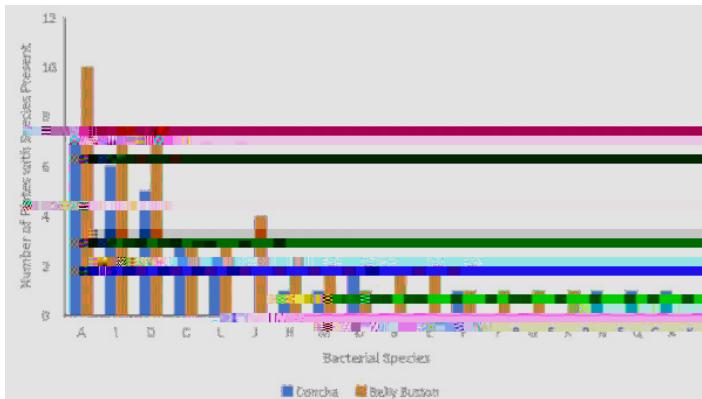

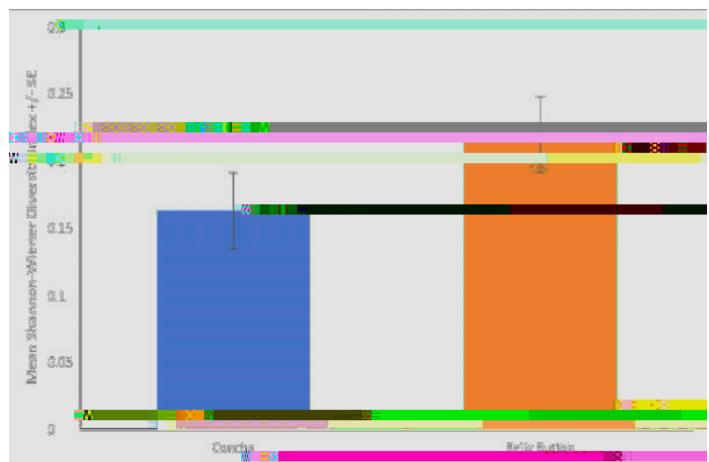

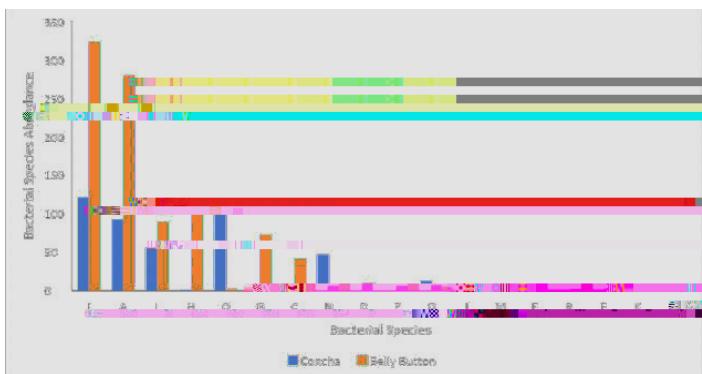

Figure 3: A $\tilde{O}(n^{1/4} \cdot k^2)$ algorithm for $\tilde{\alpha}_k$ and $\tilde{\beta}_k$. The algorithm consists of two main parts: a $\tilde{O}(n^{1/4})$ time step and a $\tilde{O}(n^{1/4})$ time step. The first part involves solving a linear system of equations, while the second part involves performing a series of matrix-vector multiplications.

Discussion
